

The logo for LIBSYS 10 features a stylized square icon on the left, composed of four colored segments: red (top-left), green (top-right), blue (bottom-left), and yellow (bottom-right). To the right of the icon, the text "LIBSYS 10" is displayed in a bold, sans-serif font. The "LIBSYS" part is in grey, and the "10" is in a vibrant orange and green gradient.

## VISION

A web based library management solution to enhance the total library experience through value added features and services.

The present times demand Library Management System to deliver much more than operational efficiency. It needs to create appreciable staff satisfaction and delightful experience for the patrons every time they interact with the system.

LIBSYS is committed to deliver value to the libraries through its products. In-depth understanding of library operations, implicit needs of the patrons and dedicated R&D efforts have guided us to deliver high quality products that have found wide acceptance in the market space.

Taking a step further, LIBSYS 10 is poised to transform the overall library experience through technological innovations, refining the work-flows and accelerating best library practices.

## Library Simplified

### ACQUISITION

We understand the challenges librarians face in managing multi-location libraries. With LIBSYS 10, multi-location libraries having centralized procurement can perform hassle free operations like centralized ordering and invoice processing with flexibility for location-wise receiving. Online indenting and approval simplifies the process.

### CATALOGUING

The Cataloguer gets a new powerful tool 'Net Cataloguing' that allows searching of catalogues of other libraries having Z39.50/ SRU-SRW/ OAI-PMH/ LIBSYS databases. Retrieved MARC 21/ MARC-XML records can be edited and downloaded into LIBSYS 10. Cataloguer works on a flexible MARC21 interface that provides quick-tips as well as in-depth online 'Help' to make the task easy. User defined iReports or AACR2 Cards provides the much desired flexibility and localization to the library.

## Circulation

LIBSYS 10 offers a new level of circulation through integration with Biometric or RFID technology. Besides the regular email reminders to patrons, options are available for instant SMS alerts and emails. Patrons can perform self reservation and self renewal. Support for multi-location circulation through location based checks and validations.

### SERIALS

LIBSYS10 builds upon the widely appreciated functional depth of serials control of earlier versions with the inclusion of MARC21 interfaces. Handling of online journals to meet changing subscription pattern of the libraries. Option to scan the cover and contents page of physical journals for publishing in OPAC. Compliance to SICI-Barcode standard.

## Reach Out

### Web-OPAC

A contemporary and user friendly OPAC inspired by Web/Lib 2.0 philosophy that emphasizes on meeting the needs and aspirations of the Users rather than just feeding information. Like, a suggestion list assists the user in building a search strategy. Patrons get comprehensive information through Table of Contents, Summary, Annotations, Authors Notes which can be further expanded through search links to 'Google', 'WorldCat', 'BookFinder' and 'Google Scholar'.

'Shelf Browse' provides the patrons a window to peek on titles available on shelf, nearby the searched book, which definitely enhances their online library experience. LIBSYS 10 encourages patrons to be more participative through sharing reviews/ ratings on titles, emailing or downloading information.

### FEDERATED SEARCH

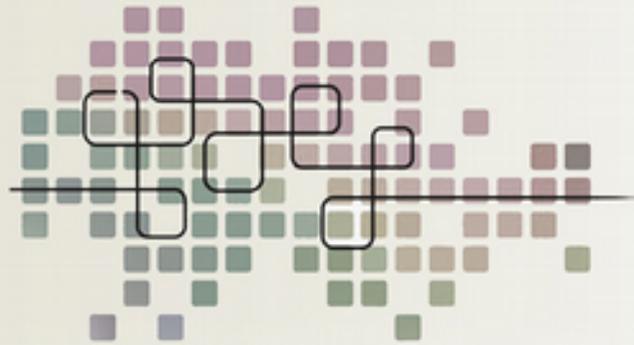

LIBSYS 10 leverages the power of Internet to perform combined search on Z39.50, SRU/SRW and LIBSYS databases. Patron has the freedom to choose the servers to be included in the search.

Site-wise listing of search results with auto merging and de-duplication. Extended Bibliographic details provide rich information on each title. Federated Search is capable of meeting the needs of most demanding patrons.

## Serving You

We deliver customer delight not only through the features and performance of our software but also with prompt and reliable services. LIBSYS has been continuously evolving its Customer Support Group to meet the growing needs of its users. In early 2009 we launched our customer care Web portal 'LSCC'.

All the users are encouraged to register their support queries in 'LSCC' for fast response. They can track their logged calls and also receive online solutions. Self help features like FAQs and repository of Past Solutions make 'LSCC' a user friendly portal.

Driven by an approach to build relationships that are valued both in terms of duration and quality, LIBSYS is fast expanding its support network.

Besides its regional offices in the metros, now resident support personnel have been placed in second tier cities all over the country with an aim to provide prompt and localized support.

User training is essential to derive true value from the LMS. LIBSYS provides comprehensive training to the end users to make them comfortable with the software.

The training is provided in a phased manner, both onsite and at LIBSYS training facilities.

We also under take special projects which include multi-location library automation, RFID system implementation, retrospective conversion, digitalization and library design & architecture.

The projects are executed by specialized teams comprising of experienced professionals from Library and IT domains.

Our customer focused services also include consulting to meet individual needs, organizing User meets and providing regular software updates.

## Expect More

### LSPremia
