Step into the future with LSAcademia, a complete ERP solution for academic institutes that simplifies workflow and facilitates communication between all the stakeholders. LSAcademia manages the complete academic cycle of the students, thereby streamlining their interaction with the faculty and management. The modular system design of LSAcademia provides comprehensive functional coverage in all the four major areas of Academics, HRMS, Finance and Procurement.

LSAcademia

Admissions

LSAcademia provides a generic selection process, from an institute specific online admission application to the final selection of students for multiple courses offered by the institute. Institutes can define their own criterion at various stages of the shortlisting of applicants for different courses including opting for a particular payment gateway.

Academics

LSAcademia covers all aspects of academic administration in a comprehensive manner, ensuring that the institute remains in control of managing academic affairs of students effectively at all times. The various academic management modules include:

Curriculum Setup

LSAcademia lets institutes structure the curriculum setup in accordance to the various Programs / Subject Streams offered, thereby providing capability to handle complex curriculums with ease. This module can be deployed for semester system, trimester system, or any other term system.

Student Record

This module accepts student data from the Admission module and facilitates the maintenance of a comprehensive profile of each student. Student ID cards can be generated as required and can be barcoded or RFID based for remote identification.

Attendance

Student attendance can be marked by the faculty on a smartphone or tablet. Attendance records can be updated daily or cumulatively on a weekly or monthly basis.

Timetable

An optimum utilisation of teaching resources and rooms can be achieved by generating a timetable using a comprehensive algorithm via this module. This timetable can be modified manually, and faculty substitution can be exercised as required.

Learning Triggers

This innovative module helps monitor syllabus progress and takes teaching to a new level with online assignments and study material submission. Students can access and interact with these seamlessly via the Communication Portal.

Examinations & Results

LSAcademia can handle different evaluation processes adopted by various education boards and universities. This module provides flexibility in defining evaluation structure in terms of tests, assignments, tutorials, practical, projects and examinations of different Programs / Subject Streams. The faculty can maintain performance of students continuously using interactive screens or smartphones/tablets, and results can be published online on the Communication Portal or e-mailed as and when desired.

Communication Portals

This salient capability of LSAcademia helps institutes create a vibrant and dynamic environment in their campuses. The student's Focused Portal provides networking features such as Forums, Blogs, Wikis, Message Boxes, Virtual Groups, etc., which initiates a seamless interaction between students and faculty members through a mobile campus. The inclusion of Bulletins, Alerts and RSS feeds generated by different functional modules of LSAcademia enhances its potential. All student data such as Student Profile, Timetable, Homework and Assignments, Examination Results, etc. can also be accessed via the Students' Portal. There are separate Portals for the Faculty and the Director/Principal.

Facilitation

LSAcademia facilitates the creation of a comfortable and conducive environment in the institute. The following modules offer student facilitation:

FEE

Events

Hostel Management

Health Management

The Fee Module automates fee generation and collection from students with the facility of online payment through any preferred payment gateway. An institute can define its fee-structure and concession schemes as applicable. All the above modules are quite exhaustive and follow an integrated approach with rest of the system.

Alumni

This module keeps the alumni of the institute consistently in touch with the happenings in the institute. Registered Alumni can access the Alumni Portal for the latest information on campus activities and other alumni events through messaging, newsletters, alerts and chat sessions.

Placement

Placement activities of the institute get a boost by deploying this highly interactive module. An integrated databank of companies can be generated and campus visits scheduled. Students can upload their CVs and can enroll for campus drives from the Student Portal. A 'Track Placement' interface provides for effective monitoring.

HRMS

The HRMS module adequately meets all the needs of the HR department such as recruitment, performance monitoring, training, succession planning and exit management. The payroll and disbursement functions in HRMS take into account a wide range of variables such as attendance, travels, staff benefits, insurances, loans, conveyance, concessions, etc.

Administration

LSAcademia facilitates the creation of a comfortable and conducive environment in the institute. The following modules offer student facilitation:

Fleet Management

Asset Management

Procurement and Inventory

Campus Security

Finance

This module meets all the requirements of a standard financial system including fund accounting, budgeting, financial statements, etc. Optionally, functions can be integrated with any preferred 3rd party FA system.

Library

This module offers unmatched depth and functionality of the most popular and widely used ILM LIBSYS, which manages the complete library process of acquisition, cataloguing, circulation and journal subscriptions.

Derive Unlimited Value

- Seamless integration
- Centralized database
- Information sharing
- No duplication of data
- Enhanced staff performance
- Communication with students/parents
- MIS for critical decisions

And More...

LIBSYS 7

Web based solution for complete library automation, including state of the art features like Federated Search, Net Cataloguing, Content Enrichment, Web/Lib 2.0 inspired OPAC.

www.libsys.co.in/libsys7

LSNetX

A Cloud based e-Commerce platform to build, manage and grow online businesses. It provides integration with CRM and Social media along with powerful SEO and Business Analytics. The Omni-Channel enterprise solution includes merchandise Procurement and Inventory control.

www.lsnctx.com

LSmart

A complete RFID/EM based solution to automate library operations fully. Provides security, self check out / check in, shelf management, stock verification. It's a fusion of world class, ISO certified RFID hardware with state-of-the-art software developed by LIBSYS.
